**Central Life Sciences Grows Sales Staff
in Zoëcon Professional Products Division**

Schaumburg, Ill., March 27, 2017 – Central Life Sciences is pleased to welcome Jacob Clabaugh to the sales team for its Zoëcon Professional Products and Vector divisions. Clabaugh will be joining the organization in the role of Sales Account Manager, managing sales in Kansas, Missouri, Nebraska, Iowa and Minnesota. He will oversee professional pest control sales, focusing on growing existing and new accounts.

“With the recent expansion to our product line and significant sales growth we’ve experienced recently, growing our staff make us better positioned to deliver the same level of service our customers have come to expect,” said Loren Cunnington, director of sales for the eastern U.S. in the Zoëcon Professional Products division. “Jacob’s wealth of knowledge and vast experience will be an advantage to our customers and help drive Vector and Zoëcon sales in the Midwest.”

Clabaugh brings more than eight years of industry experience to the role, most recently as a regional sales representative at JT Eaton. He was responsible for manufacturing sales for pest control, agriculture, wildlife and turf products in the Southeast. Clabaugh holds a bachelor’s degree in horticulture from University of Cincinnati, where he received a certificate in landscape design, turf grass management, and horticulture.

About Central Life Sciences

Central Life Sciences® products are a part of Central Garden & Pet Company. Central Life Sciences is dedicated to creating healthier environments and making life better for people, plants and companion animals around the world. As inventors of insect growth regulator technology more than 35 years ago, the founders of Central Life Sciences pioneered biorational pest control: using the insect’s chemistry as a means to reduce pest populations.
