

SIMPLY ESSENTIAL. GREEN SOLUTIONS THAT WORK

The Essentria® Lineup Knocks Down Listed Crawling and Flying Insects Using Essential Oils

CONTROL INSECTS WITH THE ESSENTRIA® LINEUP

For a softer insect control approach, reach for Zoëcon's Essentria® line of 25(b) Exempt pesticides. Featuring botanical active ingredients derived from the essential oils of plants, these environmentally friendly products offer broad application opportunities, including in sensitive accounts and uses around children, pets, and in food handling areas, because they offer little to no risk to humans or the environment. With five formulations to choose from – including two aerosols, two concentrates, and a granule – these minimum risk insecticides offer repellency to pest control for the environmentally conscious customer. The team of experts at Zoëcon is ready to help you find your perfect Essentria® solution.

ABOUT THE ACTIVE INGREDIENTS – BOTANICALS DERIVED FROM ESSENTIAL OILS

Essentria® products are formulated with naturally derived plant-based active ingredients – including rosemary oil, peppermint oil, geraniol, clove oil, and thyme oil. Botanically based insecticides have been used for centuries to control and repel pests. The natural chemical compounds of specific plants contain qualities that provide knockdown and repellency against a wide range of pests without posing an environmental threat.

APPLICATION SITES

Because it is 25(b) Exempt, the Essentria® product line can be applied in a range of sensitive locations to help eliminate insect populations.

Use Essentria® products in and around:

- Building foundations
- Daycare facilities
- Food handling areas
- Food processing plants
- Garages
- Golf courses
- Greenhouses
- Grower Facilities
- Homes
- Hospitals
- Hotels
- Lawns and turf
- Nursing homes
- Offices
- Parks
- Restaurants
- Schools
- Zoos

INSECTS CONTROLLED

The Essentria® product lineup controls a broad spectrum of insects including: Ants, Aphids, Crickets, Cockroaches, Mosquitoes, Spider Mites and other listed Flying and Crawling insects. Refer to each product's label for a specific list of pests controlled.

Ants

Cockroaches

Mosquitoes

and more

THE ESSENTIAL WAY TO CONTROL INSECTS

As society's concern for environmental responsibility grows, customers will increasingly ask for alternative pest control options. The Essentria® line of products offers sensitive, effective insecticides and repellents from essential oils derived from plants. As FIFRA 25(b) Exempt, you can feel good about treating sensitive spaces with Essentria® products, while your customers will feel good about it, too. Trust the botanical line of Essentria® products and its plant-based active ingredients to get the job done for you in an environmentally friendly manner.

BACKED BY PROFESSIONALS

If you are new to botanicals or if you just have questions, the Zoëcon team of experts is ready to help you with application tips, troubleshooting, customer expectations, and building protocols with the right tools to get the job done.
