Zoëcon Professional Products Announces Extension to Zenprox[®] Family of Products

Schaumburg, Ill., April 17, 2017 – The Zoëcon Professional Products division of Central Life Sciences will be launching a new product, Zenprox[®] Xtend Aerosol. The versatile Zenprox[®] lineup previously included two solutions, an emulsified concentrate and contact insecticide aerosol. The latest addition, Zenprox[®] Xtend, features a unique combination of four insecticidal active ingredients that provide control of a broad spectrum of insects, including an insect growth regulator for longer term control.

“By adding a proven IGR to disrupt the insect life cycle, the new Zenprox Xtend is a powerful all-in-one solution,” said Ken Turrentine, director of marketing for the Zoëcon Professional Products division. “It was specifically formulated for flexibility, allowing professionals to extend the reach of pest control protocols.”

Zenprox[®] Xtend spray is a broad-spectrum aerosol with five active ingredients, including etofenprox, PBO, pyrethrins and tetramethrin, and the trusted insect growth regulator, (S)-methoprene. The formulation offers quick kill and control of more than 25 labeled insects including ants, bed bugs, fleas and flies. Zenprox[®] Xtend can be applied indoors and out to residential and commercial buildings including apartments, hospitals, warehouses and schools. The solution provides flexible delivery options including a crack-and-crevice actuator and System III compatibility.

About Central Life Sciences

Central Life Sciences products are a part of Central Garden & Pet Company. Central Life Sciences is dedicated to creating healthier environments and making life better for people, plants and companion animals around the world. As inventors of insect growth regulator technology more than 35 years ago, the founders of Central Life Sciences pioneered biorational pest control: using the insect’s chemistry as a means to reduce pest populations.
