

Golden Malrin® Fly Bait

Golden Malrin® Fly Bait's two-phase action knocks out nuisance flies quickly and effectively. First, Muscamone® fly attractant draws flies in. Then, as they feed on the sugar-based bait, the active ingredient, Methomyl, delivers the final blow, killing flies after they ingest it.

Golden Malrin® Fly Bait is highly effective in rotation with *QuikStrike® Fly Bait*. Rotation of these two active ingredients reduces the likelihood of resistance that can result from the use of a single scatter bait.

Golden Malrin® Fly Bait:

- Consistent formula for killing power right down to the last grain of product.
- Can be used daily, scattered or in a bait station.
- Is available in 1 lb, 5 lb, and 40 lb sizes.

Application Tips

Golden Malrin® Fly Bait can be distributed directly from the container or other device on a daily basis to maintain control as long as the fly population is large enough to consume 4 oz. of bait within a 500 square foot area within one day. As populations decrease, so too should distribution. Keep 1 to 2 inch intervals between particles for maximum coverage and to avoid piles.

Golden Malrin® Fly Bait is ideal for use in these areas (follow label directions):

- Feedlots
- Broiler houses
- Milking parlors
- Walkways in cage layer operations
- Meat and poultry and other food processing plants
- Stables
- Refuse dumpsters, warehouses and more!

QUIKSTRIKE

QuikStrike® Fly Bait

Dinotefuran, the active ingredient in **QuikStrike® Fly Bait**, kills house flies quickly and controls those resistant to organophosphates and Pyrethrin. Because it is different than the active ingredient in most generics and the leading competition, there is no documented evidence of resistance to the active ingredient, Dinotefuran.

QuikStrike® Fly Bait:

- Contains a homogenous formulation.
- Contains a Z-9 tricosene attractant that lures both male and female flies to the bait.
- Is equally effective scattered or in a bait station.
- Large particle size.
- Is available in 1 lb, 5 lb, and 40 lb sizes.

Application Tips

QuikStrike® Fly Bait is scattered at a rate of ¼ lb per 500 square feet of area and/or in bait stations up to 2 ounces per station. For best results, use **QuikStrike® Fly Bait** in a steady rotation with **Golden Malrin® Fly Bait**.

Bigger is Better.

QuikStrike® and Golden Malrin® Fly Bait particles are larger than competing brands, which means no getting lost in debris and consequently more product is available to kill more flies.

Quickbayt®

QuikStrike® Fly Abatement Strip

The **QuikStrike® Fly Abatement Strip** contains the powerful active ingredient, Nithiazine, which kills flies seconds after they begin to feed. A triple-action attractant leads flies to the strip where they are instinctively drawn to its curved design. This design exposes more surface area and facilitates fly feeding.

QuikStrike® Fly Abatement Strip:

- Easy-to-use.
- Unique station design is fly friendly.
- Kills flies in seconds once they begin feeding.

Application Tips

Place **QuikStrike® Fly Abatement Strip** near ground level, where flies feed. Placement higher than four feet is not recommended. They should also be located away from direct moisture and sunlight.

QuikStrike® Fly Bait and **QuikStrike® Fly Abatement Strip** are ideal for these locations (follow label directions):

- Livestock barns
- Compactor chutes
- Feedlots
- Trash receptacles
- Kennels
- Semi-enclosed docks
- Recycling areas
- Dumpsters
- Broiler houses
- Poultry processing plants
- Walkways in caged layer operations
- Sheds
- And more!
